2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Subject	Georgia							
	Total		In married-couple family household		In male householder, no wife present, family household		In female householder, no husband present, family household	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Children under 18 years in households	2,452,767	+/-1,827	1,563,481	+/-9,496	155,273	+/-4,659	716,730	+/-8,958
AGE

POVERTY STATUS IN THE PAST 12 MONTHS								
Children in households for whom poverty status is determined	1,352,289	+/-1,909	909,221	+/-6,127	80,189	+/-3,270	360,856	+/-5,462
Income in the past 12 months below poverty level	17.4%	+/-0.4	7.9%	+/-0.4	24.5%	+/-1.9	39.2%	+/-1.0
Income in the past 12 months at or above poverty level	82.6%	+/-0.4	92.1%	+/-0.4	75.5%	+/-1.9	60.8%	+/-1.0
HOUSING TENURE								
Children under 18 years in occupied housing units	1,368,154	+/-1,303	912,914	+/-6,163	83,246	+/-3,389	362,997	+/-5,440
In owner-occupied housing units	67.1%	+/-0.5	80.1%	+/-0.5	51.2%	+/-2.3	38.5%	+/-0.9
In renter-occupied housing units	32.9%	+/-0.5	19.9%	+/-0.5	48.8%	+/-2.3	61.5%	+/-0.9

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Foreign born excludes people born outside the United States to a parent who is a U.S. citizen.

Excludes householders, spouses, and unmarried partners.

Public assistance includes receipt of Supplemental Security Income (SSI), cash public assistance income, or Food Stamps.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
